

FIRST NATIONS-LED MODULAR CONSTRUCTION

Precision-built, NCC-certified accommodation for Australia's renewable energy, resources, infrastructure and community-housing programs.

Aluxria designs, manufactures and supplies relocatable modular buildings engineered for a 50-year service life and Australian environmental extremes. We deliver at scale through a First Nations-led consortium, and we steward every asset across its full lifecycle under the Aluxria Care framework — so the accommodation a project pays for becomes durable value for the region that hosts it.

01 WHAT WE DO	02 HOW WE DELIVER	03 WHAT LASTS	
Design & manufacture Modular accommodation designed and built to the National Construction Code. S70 and S40 systems, BAL-FZ bushfire and cyclone-rated, engineered for remote and regional Australian conditions. Digitally gated factory quality assurance prior to dispatch.	Supply, install & scale Crane-liftable, pier and screw-pile foundations — no permanent slab, no rezoning. Staged quarterly delivery aligned to workforce ramp-up. Production capacity to 100 units per month, extendable through consortium partners for large programs.	Lifecycle stewardship Every building carries an Aluxria Care Asset Passport and transparent Care Score, backed by a 7-to-10+ year warranty and a 50-year service architecture. Fully relocatable and re-deployable — engineered for reuse across multiple project lifecycles.	
100 /mo UNITS · PRODUCTION CAPACITY	50 yrs DESIGNED SERVICE LIFE	BAL-FZ & CYCLONE RATED	NCC CERTIFIED · CLASS 1, 2 & 3

CORE CAPABILITIES

CAPABILITY 01

Modular design & engineering

Accommodation, amenities and infrastructure buildings designed for compliance, comfort and durability.

- NCC Class 1, 2 and 3 building types
- S70 and S40 modular systems
- BAL-FZ and cyclone-rated envelopes
- Solar microgrid and rainwater-capture ready

CAPABILITY 04

Lifecycle & asset care

The Aluxria Care framework wraps a financeable, tradable asset architecture around every building.

- Tamper-evident digital Asset Passport
- Transparent, point-based Care Score
- 7-to-10+ year warranty; 50-year service life
- Certified Partner Network for service

CAPABILITY 02

Manufacture & quality

Controlled factory production with documented quality gates — precision, repeatability and schedule certainty.

- Up to 100 units per month, single-facility
- Digitally gated QA prior to dispatch
- Extendable capacity via consortium partners
- Australian data residency for asset records

CAPABILITY 05

Relocation & reuse

Assets engineered to move — redeployed across sites and successive project phases rather than written off.

- Fully relocatable, crane-liftable systems
- Re-deployable to adjacent or new sites
- Certified Pre-Owned resale pathway
- Transition to community or key-worker housing

CAPABILITY 03

Delivery & installation

Staged deployment that matches accommodation supply to workforce demand, minimising upfront capital.

- Crane-liftable, pier / screw-pile founded
- No permanent slab, no rezoning required
- Quarterly staged delivery to ramp-up
- Full village infrastructure, not modules alone

CAPABILITY 06

Indigenous participation

First Nations-led by design, with genuine procurement and workforce outcomes that can be documented.

- Supply Nation registered business
- Local employment and training on delivery
- First Nations subcontract and service packages
- Legacy asset pathways to Traditional Owner land

MARKETS, EXPERIENCE & COMPLIANCE

A single procurement decision that delivers compliant accommodation now and durable regional value after.

THE ORGANISATION

Who Aluxria is

Aluxria is a First Nations–led modular construction business specialising in precision-built, relocatable accommodation for major Australian projects. We combine controlled factory manufacture with a lifecycle stewardship framework, and we deliver large programs through the First Nations–led HALO Village Delivery Consortium. A significant share of Aluxria's commercial profit funds the HALO Foundation's regional housing and First Nations community programs — commercial delivery and community benefit are structured as a single loop.

CONSORTIUM DELIVERY

Modular partner within the HALO Village Delivery Consortium — a First Nations–owned principal contractor, engineering and prefabrication capacity, and specialist civil and renewable-energy infrastructure partners.

SECTORS SERVED

Renewable energy, mining and resources, government and social infrastructure, essential-worker and affordable housing, eco-tourism and First Nations community housing.

GEOGRAPHY

Remote and regional Australia. Active engagement across NSW (Hunter, Central West), the Northern Territory and the Northern Rivers, with capability nationwide.

PRODUCTS & TECHNICAL SPECIFICATION

BUILDING SYSTEMS		VILLAGE SCOPE	DELIVERY MODEL	
Modular systems		What we build	Scale & schedule	
Systems	S70 & S40 modular	Complete village infrastructure, not accommodation modules alone: - Private dwellings and amenities - Dining, kitchen and laundry facilities - Gym, wellness and recovery spaces - Training rooms and communal buildings - Landscaped zones, walking paths, gardens - Solar microgrid, rainwater and water management	Capacity	20 to 400+ beds demonstrated
NCC classes	Class 1, 2 & 3		Production	To 100 units / month
Bushfire	To BAL-FZ (flame zone)		Staging	Quarterly, to workforce ramp-up
Wind	Cyclone-rated regions		Program	5–6 year durations supported
Foundation	Pier / screw-pile; no slab		Design life	50+ years
Relocatable	Crane-liftable; redeployable		Warranty	7 years, extendable to 10+

Products and specifications reflect current standard offerings. Configurations are tailored to site conditions, servicing and client requirements at scoping stage.

EXPERIENCE & CORPORATE DETAILS

Delivery experience, compliance and the details a procurement team needs to qualify Aluxria.

SELECTED EXPERIENCE

Dinawan Energy Hub NSW · RENEWABLE ENERGY	400+ bed workforce village. Expression of Interest submitted to Spark Renewables through the HALO Village Delivery Consortium, with staged quarterly delivery aligned to construction ramp-up.	EOI SUBMITTED
Windows on the Wetlands NT · CULTURAL & TOURISM	Custodian-led cultural learning and economic hub on Country, with low-impact accommodation supporting a five-engine operating model. In partnership with the Kennon families, Pudukul and Innovation200.	STAGE 2 EOI
Vacy Village NSW · COMMUNITY HOUSING	Intergenerational regional village on a Hunter-region site, demonstrating mixed-composition modular community housing and the transition of accommodation into lasting regional assets.	IN DEVELOPMENT

Project status is stated as at 2026 and reflects Expressions of Interest and partnerships in development. Aluxria participates as the modular design, manufacture and supply partner. Contract value, references and further project detail are available on request.
