

Deployable modular accommodation & base infrastructure

Sovereign, First Nations–owned modular construction for Defence — rapidly deployable, NCC-certified, and engineered for austere, remote and northern Australian conditions.

01 The capability

WHAT WE DELIVER

Rapidly deployable, relocatable modular buildings — complete facilities, not modules alone.

- Accommodation, messing, ablutions, headquarters, medical and training facilities
- Full site infrastructure — power, water, communal and support buildings
- Crane-liftable and re-deployable across bases, training areas and remote sites

Precision-built modules + integrated services — factory-built, site-assembled, relocatable.

02 Defence value

WHY IT MATTERS

- **Rapid standup and teardown** — minimal site works; pier / screw-pile founded, no permanent slab, no rezoning
- **Built for austere and northern operations** — BAL-FZ bushfire and cyclone-rated for tropical and remote bases
- **Enduring asset, not a disposable camp** — 50-year design life supports base regeneration and lasting accommodation
- **Estate flexibility** — redeployable to meet surge, exercises and force-posture change
- **HADR-ready** — the same system supports domestic disaster response and community recovery
- **Sustainment reduced** — less reliance on FIFO and temporary leasing; lifecycle managed from day one

03 Technical approach

SPECIFICATION & STANDARDS

- **NCC-certified** Class 1, 2 & 3 — S70 and S40 modular building systems
- **BAL-FZ** (flame zone) and **cyclone-rated** envelopes; engineered for Australian extremes
- Crane-liftable, pier / screw-pile foundations — fully relocatable and re-deployable
- Solar microgrid, rainwater capture and water management ready for off-grid sites
- Digitally gated factory QA; each unit carries an Aluxria Care Asset Passport and Care Score

Production to 100 units / month

Design life 50+ years

Capacity 20 to 400+ beds

Warranty 7 yrs, to 10+

04 Delivery & sovereignty

CREDENTIALS & CONTACT

- **Sovereign, First Nations–owned** — aligns with the Commonwealth Indigenous Procurement Policy (IPP) and Australian Industry Capability (AIC)
- **Supply Nation registered** Indigenous business
- Delivered through the First Nations–led **HALO Village Delivery Consortium** — principal contractor, engineering & prefabrication, civil & infrastructure
- Staged quarterly delivery; 5–6 year program capability
- Defence security & quality credentials (DISP membership, ISO 9001): *to confirm*
